Totally integrated turn-key Wet Cast start-up kit available for the first time!

Automacad Inc. and Rosetta Hardscapes LLC. jointly collaborate on multiple Wet Cast start-up turn-key projects, driving the development of cutting-edge Wet Cast equipment for manufacturing products of the highest quality and precision.

The newly developed turn-key start-up kit is revolutionary in that it offers a fully integrated and comprehensive solution to a beginner Wet Cast producer while keeping future expansion possibilities in mind as the entire kit is highly modular and scalable. "Working with Rosetta Hardscapes, a company whose name is synonymous with products of the highest quality and natural look, has allowed Automacad to get a perspective of all the factors involved in delivering totally integrated turn-key solutions." says Louis Hébert, President, Automacad Inc.

Jeremy Manthei, President at Rosetta Hardscapes, says: "Concrete products manufacturers want to make things that have high value in the marketplace, but can be produced with low production costs. Rosetta's Wet Cast products have proven to have high value to customers. Automacad equipment has proven capable of making Wet Cast products at a low cost. By collaborating, we are able to offer our mutual customers a very exciting, profitable opportunity."

Automacad Inc. is an expert manufacturer of concrete production

Wet line with an automatic release agent applicator

machinery. Among various other concrete-related projects, the company specializes in providing tailored innovative solutions for the Wet Cast industry. Automacad optimizes production by creating new concepts and equipment, modifying/improving machines and adding value to existing processes. Rosetta Hardscapes LLC. develops, sells and licenses innovative Wet Cast hardscape products and molds. Rosetta's comprehensive product line

includes Wet Cast pavers, fire pits, retaining walls, steps and more, all with the colors and textures of natural stone.

Rosetta Wet Cast products produced on Automacad's production equipment
