

Automacad Inc., Cadiac (QC), J5R 6X1, Canada

One step into the future with new Process Leader

Cadiac (Quebec) Canada based company Automacad Inc, known to be a leader for the Wet Cast Industry, made an important step into the future. To offer a complete solution to the market and give a deeper support upstream or downstream in automation or process improvement to their customers, Louis Hebert (president), extended his team by hiring Mr. Uwe Klaus.

In May 2017, Uwe Klaus became a member of Automacad's highly experienced and dynamic engineering team. Mr. Klaus is a mechanical engineer with a wide range of experience in concrete manufacturing, process improvement, de-

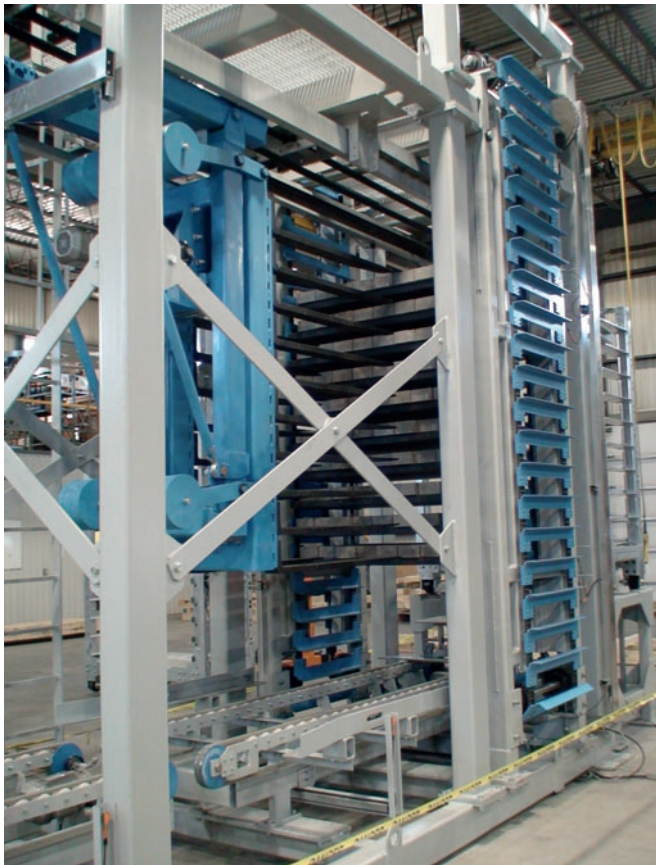

velopment and manufacturing of Wet Cast molds and products. In his 25 years career in the concrete industry, Mr. Klaus has held different positions for renowned companies like Schmitt & Weitz Baustoffwerke GmbH [now Lithonplus GmbH & Co. KG] (Germany), EP Henry Corporation (New Jersey, USA) and Tremron Corp. (Florida, USA).

*Uwe Klaus,
Process Leader
at Automacad inc.*

"As a Process Leader, Mr. Klaus will be supplementing our team of engineers in the area of customer relations, business development, customer's process improvement and in our new field of consulting services. His many years of experience on the production side, will make him our in-house "customer's voice" and a reference for any concrete project our customers may have", Louis Hebert stated.

Consulting will round up the already wide portfolio of services Automacad offers worldwide to its customers, including development of customized equipment and technical solutions, state of the art machine safety and full after-sales service.

Innovative handling system
